DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 17 are drawn to a wirings on a first substrate and electrodes on an opposing substrate wherein the wiring is connected to an electrode on an opposing substrate, classified in class 349, subclass 153.
- II. Claims 14, drawn to a liquid crystal display having two protrusion portions on a substrate with a wiring having an oxide layer and a metal layer and the metal layer has a lower resistance than the oxide layer formed in a region outside an opposing substrate, classified in class 349, subclass 151.
- III. Claims 15-16 and 18-19 are drawn to a liquid crystal display having conductive shading film between the electrodes, classified in class 349, subclass 111.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are all related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility from inventions II and III such as an EL display. In the instant case, invention III has separate utility from inventions I and II such as plasma addressed display. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2871

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
